

CRARY®

BIG TOP™

“

Not as many trips to the truck. Less fuel, less labor. I added a Crary® Big Top™ and eliminated a grain cart.

- Mark B. | North Dakota

BIG TOP™

PERFECT SIZE

The Crary® Big Top™ fits most combines.

DURABLE

All steel components are powder-coated for a seamless look and to resist wear.

GREAT CLEARANCE

Crary Big Tops fold down, giving you the clearance you need for storage.

As equipment gets bigger, faster and more efficient, the ability to move, store and simply handle your yield becomes especially important. Better farming practices, larger fields and bumper crops all lead to more frequent unloading of your harvester. The difference between making a full round; or harvesting an extra few minutes may be accomplished with more capacity. Crary® Big Top™s are developed with the use of a 3D laser scanner to help engineer future improvements and innovations.
