“

REVOLUTION DITCHER[™]

In Fall of 2020, we ditched over 1800 acres with one man and one machine which would not be possible without the Revolution Ditcher.[™]

- Mark H. of Roseau, MN

”

REVOLUTION DITCHER™

Easy access drain plug.

Shielded cooling fan provides increased continuous power rating and extended life.

80mm (3.15") input shaft.

Vented fill cap for increased durability.

100mm (3.94") output shaft.

A PATENTED Cross Auger design breaks up material for optimum performance, allowing up, down, fore, and aft adjustments.

B Hydraulically adjustable dirt deflector – both sides.

C Large flotation tires are standard to reduce soil compaction and higher ground clearance.

D Ladder and steps for easy access to GPS globe and mast.

E Industrial spec and efficient planetary gearbox is heaviest in the market.

MANUFACTURING FARM PROFITABILITY™

The Revolution Ditcher™ by Crary® is setting the standard for moving dirt to create and/or maintain waterways, ditches and terraces. Efficient water management of your field increases yields and profits. The 5-foot flat bottom leaves a smooth finish allowing equipment to pass through with ease. No one field is the

same – the ability to throw dirt in both directions is a huge benefit. If you are looking to park your old scrapers, graders and bulldozers to avoid piles or huge lumps of dirt to work down...check out the Revolution Ditcher and cut the time in half to create or maintain the perfect ditch, terrace or waterway!

Features

- ✓ 6.5-foot diameter rotor designed for rock and high volume throughput.
- ✓ Integrated PWM valve and control box.
- ✓ Hydraulic tilt-control.
- ✓ Cuts a 5-foot flat bottom ditch up to 10" deep in single pass.
- ✓ Throws dirt up to 165' in either direction or can be windrowed next to machine.
- ✓ Straight driveline to a planetary gearbox that is clutch protected.

- ✓ Auto-level with separate elevation controls.
- ✓ Bolt-on replacement wear parts.

Options

- ✓ Frost Teeth Kit for breaking ground in late fall or early spring.
- ✓ Light Kit that includes running lights, brake lights, turning signals as well as working area lights.
- ✓ Extension Chutes for added control of where you're throwing dirt.
